“Inflammatory MyoPericardial Syndrome (IMPS): The New Acronym Introduced in the 2025 Guidelines – What Does It Mean?”

given by:

Massimo Imazio, MD, FESC, FHFA, FEACVI

*Professor of Cardiology; Director of the Cardiothoracic Department,
University Hospital Santa Maria della Misericordia, Udine, Italy*

Prof. Massimo Imazio is Full Professor of Cardiology and Director of the Cardiothoracic Department at the University Hospital Santa Maria della Misericordia in Udine, Italy, a tertiary referral centre for cardiovascular diseases, inflammatory heart diseases, and heart transplantation.

Prof. Imazio is internationally recognized for his long-standing clinical and research activity in inflammatory myocardial and pericardial diseases, including pericarditis, myocarditis, and myopericarditis. He has played a leading role in advancing the understanding, diagnosis, and management of these conditions through clinical research and international collaborations.

He served as Chair of the European Society of Cardiology (ESC) Working Group on Myocardial and Pericardial Diseases and was Chairperson of the 2025 ESC Guidelines on Myocardial and Pericardial Diseases.

Prof. Imazio has authored more than 500 papers in peer-reviewed medical journals and has an h-index of 72, reflecting his major scientific contribution to cardiovascular medicine and inflammatory heart disease.
